

Protagen Protein Services GmbH is a leading international specialist in the field of GMP-compliant protein analysis with locations in Heilbronn and Dortmund, Boston (MA) and since July 2021 Heidelberg. We have a strong track record in supporting our customers with integrated scientific services and advise towards the development of therapeutic protein drugs and Gene Therapeutics within the constraints of international development teams, short market approval timelines and the highest quality standards. For more than 20 years we owe our success to our employees, who pursue their tasks with joy and commitment.

Following the merger with two peer contract research organization in Boston and Heidelberg we are now looking to harmonize and further integrate several internal business processes towards a unified, high-quality customer service.

We are looking for a driven, interculturally sensitive high-impact individual to project-lead the integration of our US/EU businesses as an

Interim Post-Merger Integration Manager (m/f/d)

Your Responsibilities:

- Successful implementation of a post-merger integration plan
- Function as project management officer for all operational integration aspects
- Understand local way-of-working issues and motivate towards win-win outcomes
- Implement new and sustainable organizational processes
- Support and consult function to team heads

Your profile:

- Experienced in post-merger integration including US/Germany integrations
- Ideally 5 years industrial experience in Life Science industry or comparable technical consulting environment
- Leadership experience is an advantage
- Distinctive expertise and interest in project management, planning and coordination
- Fluent English and German language (oral and written) and advanced computer proficiency
- Inter-cultural skills obtained from relevant projects
- Experience with laboratory operations, ideally in a GMP-regulated environment, is very useful
- IT-Systems integration skills are very useful
- Seasoned conflict and expectations manager with pro-active, empathic and natural communication skills
- Drive with target achievement focus, flexible bridge-builder and troubleshooter.

Our offer:

- Flexibility of a part-time to fulltime engagement for 4-6 months
- Responsible and diversified duties in a professional high motivated team
- Employment in a dynamic growing Life Science organization with more than 170 employees
- A motivating environment with entrepreneurial agility and cutting-edge scientific background
- Appreciation, openness and respect as well as a lively feedback culture

We are pleased to receive your complete application documents via email (HR@ProtagenProteinServices.com) as well as your earliest starting date and your salary expectation.
